# TEST OF VARIABLES OF ATTENTION (T.O.V.A.®) Ordering Form and Process Information (Version 8)

## T.O.V.A. Report Types:

**Clinical Version:** A graduate degree in medicine, psychology, counseling, or closely related field that includes training in the administration and interpretation of tests and a license or certificate by a state agency.

**Screening Version:** At least a BA in Psychology, counseling, or a closely related field, and relevant training or coursework in the interpretation of tests and measurement at an accredited college or university; OR Verification of membership in a professional association recognized to require training and experience in the ethical and competent use of tests; OR Certified by an agency which does the same.

If a version is not checked or proper degree not listed in contact information a **SCREENING** version may be sent.

### The T.O.V.A. 8 requires a computer that has:

- An x86 or x86-64 processor running at 1 GHz or better
- 512 MB or more of memory
- 100 MB or more of hard drive space
- One free USB port on the computer (not on an external USB hub)

### The T.O.V.A. 8 requires a display that:

- is equal to or greater than 10 inches (measured diagonally)
- has a resolution of 1024 x 768 pixels or better

### Operating System Requirements - The T.O.V.A. 8 can run on the following operating systems:

#### Windows

- Windows XP (32-bit, SP2 or better)
- Windows Vista (all versions)
- Windows 7 (all versions)
- Windows 10 systems upgraded from Windows 7
- New Windows 8 or 10 systems (with EAV setup)

#### Mac

- Mac OS X 10.7.5 or newer.
- MacBook Air users must have an external optical drive or order a T.O.V.A. flash drive to use the Precision Test Environment (PTE).
- iMac users must use a USB keyboard (not a wireless keyboard) in order to use the Precision Test Environment (PTE).
- 2015 and newer MacBook Air and Pro must use EAV setup.

### External Audio/Video ("EAV") Setup

EAV setups allow the user to administer the T.O.V.A. without rebooting.

- Requires an external monitor and speakers, as on a desktop computer.
- A VGA video port on the host PC is strongly recommended.

### Precision Test Environment ("PTE") Setup

The PTE setup allows administering the T.O.V.A. test on a computer without an external monitor, such as a laptop. This requires rebooting the computer into the T.O.V.A. 8 PTE.

- Requires a graphics card that supports 1024 x 768 x 16-bit video mode.
- Bluetooth keyboards and mice are not supported. For example, this means that the wireless keyboard shipped with the Apple iMac will not work.
- Apple computers require the included T.O.V.A. boot CD or a T.O.V.A. flash drive to enter the PTE.

### Note that:

- Most "netbook" and many "ultraportable" laptops do not meet the screen size and resolution requirements and thus will not work with the PTE.
- We don't recommend Toshiba Satellite or Satellite Pro laptops because of their often incompatible designs.

**Additional Test Credits:** Test credits are used by the T.O.V.A. program whenever a test has been given in order to receive results. T.O.V.A. kits come with 5 test credits ready to be used.
